

*Develop leaders that build human capability and deliver stakeholder confidence in future results.*

# *The Leadership Code® Academy*

**Build human capability by developing results-based leadership.**

A powerful, cohort-based digital development journey that helps leaders learn how to deliver results with impact.

*Less is more—minimum effective dose for people who have lots of other things to do.*

If your organization had better leadership, what would happen? What would it mean to your customers, employees, investors, and other stakeholders?

In the Leadership Code® Academy, participants are taken on a journey where they learn not just the attributes of leaders but also how to deliver results that matter to the organization and its stakeholders. The academy is designed around the 5 domains of the Leadership Code®:

- **Strategist:** Shape the future
- **Executor:** Make things happen
- **Talent Manager:** Engage today's talent
- **Human Capital Developer:** Build the next generation
- **Personal Proficiency:** Invest in yourself

**AUDIENCE:**

Leaders at all levels.

**FORMAT:**

- 6-week digital development program using a blend of self-guided learning assignments and weekly consultant facilitated learning and application sessions
- 16 modules presented by Dave Ulrich and Norm Smallwood about how to build results-focused leaders in your organization (videos, reading, exercises)
- Open-enrollment or enterprise programs available

## A Day in an Academy Sprint

In two to three 40 minute modules per week, individuals will learn from experts that teach leading-edge ideas, show leaders how to use new tools on the job, and illustrate how to apply what they learn each day.
